

2mag AG Statement on Conflict Minerals

06th of October 2020

2mag AG is the leading global supplier for conception, development, production and sales of magnetic-inductive drive concepts for the laboratory market.

2mag AG is concerned about the human tragedies occurring the Democratic Republic of Congo and adjoining countries associated with the mining of tantalum, tin, tungsten and gold. Many of our products are containing at least one of the named metals. Therefore the company has taken steps aimed at eliminating the use of minerals from that region.

2mag AG expects its suppliers of components and raw materials to undertake reasonable due diligence with their supply chains to assure that these metals are not being sourced from mines in the DRC or adjoining countries. 2mag AG has identified and surveyed key suppliers of components and raw materials concerning the origin of these metals.

2mag AG has either obtained, or is in the process of obtaining, informations from suppliers concerning the conflict-free origin of metals that are used in the manufacture of 2mag AG's product. Based upon information provided, 2mag AG does not knowingly use metals from the conflict regions.
